INPAL Industries

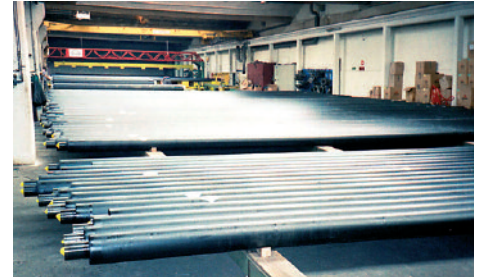

INPAL *Pre-insulated pipelines' manufacturer*

INPAL Industries is now the French manufacturer of pre-insulated pipes systems for District Heating and Cooling networks, transportation of hot fluids from low to high temperatures. Our production facilities cover all requirements for different preinsulated pipes systems.

The head office is located in CHAPONNAY (69), in the south of LYON.

Two plants and ten sales offices constitute an operational team of 100 people.

INPAL *and the markets*

DISTRICT HEATING

Adapted and constantly updated to the latest technologies to meet the energy and environmental operators' requirements, **POLYURETUB 130**, **TUCAL** and **ISOPAL** pre-insulated pipes and accessories have their place in high and low temperatures networks. The range of sizes from DN 20 to DN 1000 is suitable for smaller networks as well as the largest.

DISTRICT COOLING

INPAL Industries has extensive experience in District Cooling networks. We have provided several tens of kilometres **POLYURETUB 130** for the erection of CLIMESPACE - Paris, CLIMAESPACO / Lisbon - Portugal and DISTRICLIMA / Barcelona - Spain networks.

INDUSTRY

Our technology allows us to insulate any type of carrier pipe (stainless steel, alloy steel, thermoplastic and resin, iron), we can meet the requirements of utilities networks for oil industries, paracheicals, paper, pharmaceutical, horticultural, food, etc.

INPAL *and Quality*

In 2006 INPAL Industries has brought up to date with TUV Saarland its Certificate of Approval certifying that its quality system meets the ISO 9001 requirements. Our products are manufactured in accordance with the European standards EN 253, EN 448, EN 488, EN 489, EN 14419 and EN 13941.

All our products are subject to a Technical Advice from C.S.T.B. (Scientific and Technical Chamber of the Building). AT CSTB 14/08-1227 on **POLYURETUB 130**, AT CSTB 14/05-951 on **TUCAL**, AT CSTB 14/02-773 on **ISOPAL**.

INPAL *and Environment*

Preservation of environment is one of considered elements by INPAL Industries as compulsory to company's development. All components used in our manufacturing process are in strict conformity with the in force Europeans norms and regulations regarding the preservation of environment.

Our geographical proximity makes deliveries more flexible and we can go quickly on site if necessary. In addition, with a shorter transport we reduce emissions of CO².

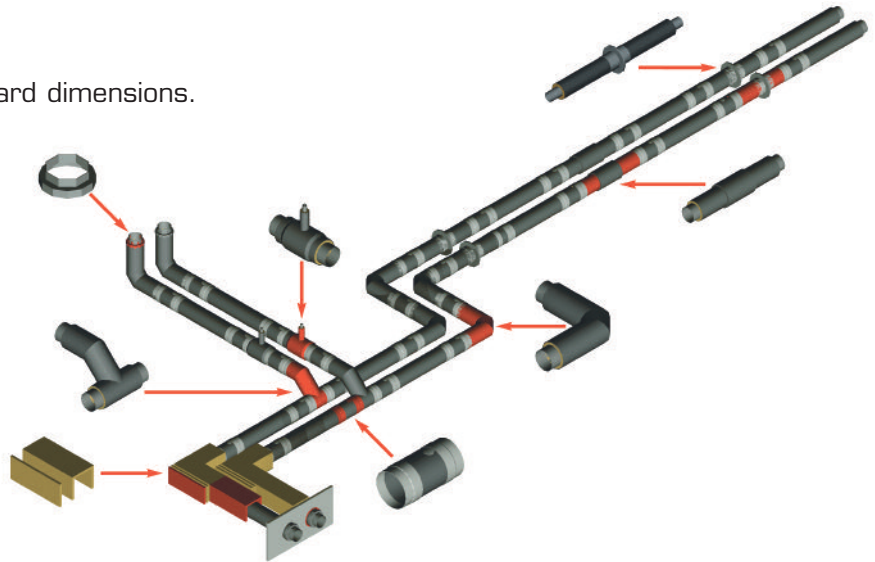

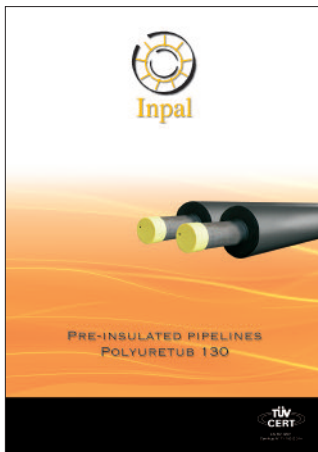

INPAL: our products

Our range of products covers a wide range of temperatures from -50°C to +400°C

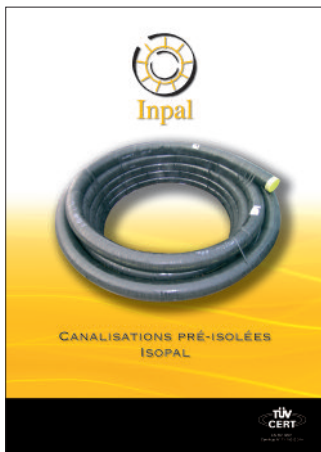

POLYURETUB 130

Transportation of fluids up to 130°C continuous operation.
From DN 15 to DN 1000.
Bonded system.
P.U. foam Insulation.
HDPE casing.
Pipes and fittings available in standard dimensions.

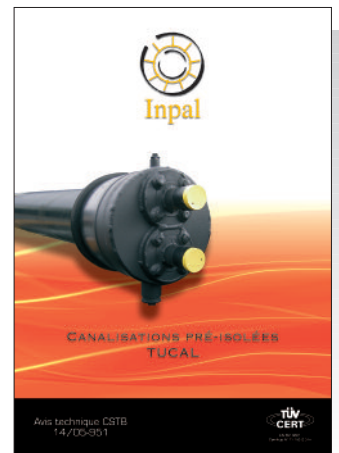

TUCAL

Transportation of fluids and/or steam with temperatures above 130°C.
From DN 20 to DN 500.
Pipe-in-pipe system.
Mineral wool and air gap Insulation.
PE coated steel casing.
Pipes and fittings manufactured on request.

ISOPAL

Transportation of fluids up to 90°C continuous operation.
From DN 25 to DN 110
Flexible system
Single or double carrier pipe.
P.U. Foam Insulation.
HDPE casing.
Screw or Press connections.

OUR VALUES

Accompany our customers in their approach to energy efficiency.
Ensuring Quality through standards and qualifications in force.
Respect the environment at each stage from production to commissioning.
Ensure a constant responsiveness by geographical proximity.
